

COMMAND: INITIATE HIGH-END HOMEPAGE SANDBOX

[CLAUDE-LOGIC ENABLED]

YOUR MANDATE: Build a single Homepage laboratory. You must use the "Viral Claude Logic" to escape AI design traps. If any section looks like a "default" template, you are directed to **CRITIQUE AND GRILL YOURSELF**, then re-engineer it using **AESTHETIC FRICTION**.

1. APPLY VIRAL DESIGN LOGIC

- Self-Audit: Every component audited for "AI-Standardness." Replace generic cards with Broken Grids and Interlocking Sections.
- Bespoke Primitives: Build from raw Tailwind; no pre-fab components.

2. GRID & ARCHITECTURE

- Vertical Anchoring (100vh spines) and 70/30 Optical Weight.
- Baseline Breaking: Staggered content clusters must never align perfectly.

3. THE AESTHETIC FOUNDATION

- Light-Dominant Theory: Backgrounds #FAFAFA. Dark tones as "Structural Ink" only.
- 5% Color Rule: Brand colors for CTAs and "Pops." No full-color backgrounds.
- Anti-Flat Depth: Use SVG noise grain and backdrop-blur layering.

4. TYPOGRAPHY & RHYTHM

- Editorial Chunking: No walls of text. 1:3 ratio of Headings to Body.
- High-Contrast Pairing: Geometric Sans + Premium Serif. NO SCRIPT OR RUGGED FONTS.

- 5:1 Structural Scale: Massive H1 vs. breathable Body text.

5. TRUST & CONVERSION

- Two-Scroll Mandate: Value prop and CTA must be clear within two scrolls.
- Monochrome Pedigree: Format trust signals as monochrome "stamps" (40% opacity).

6. INTERACTIVE & MOBILE

- Mobile Alter-Ego for every section; do not just stack.
- Component Semantics and 4px/8px mathematical baseline for spacing.

PROCEED: Build 10 unique structural archetypes on this Homepage Sandbox. Do not move to Phase 2 until this DNA is perfected.
